

11 / 12

A cross-sectional view of a circular structure 20. The structure consists of three concentric layers: an innermost layer 20a, a middle layer 20b, and an outermost layer 20c. Layer 20a is the thickest and is filled with diagonal hatching. Layer 20b is a thin layer with a dotted pattern. Layer 20c is the thinnest and is filled with diagonal hatching. The entire structure is circular and has a central void.
